SYSTEMS

“SUPERIOR SYSTEMS TO ENHANCE THE RELIABLE AND LONG-LIFE OPERATION OF EKKI PUMPS”

CONTROLS

Controls

Technical data :

Power range	: 0.5 - 90.0 HP
Supply Voltage	: A.C Single Phase (220V-240V) 50Hz
	: A.C Three Phase (380V-415V) 50 Hz
Versions	: 1Ø - Capacitor Start Capacitor run CSCR / CSR
	: 3Ø - Direct on Line, (DOL) Star/Delta

Features and benefits :

- Start/stop by means of a float switch of manual start/stop.
- Protects the pumpsets against dry running conditions.
- Ammeter and voltmeter provisions to check voltage and current ratings.
- Quickly Cut off the power supply on voltage fluctuations and phase cut.
- Indicator lights for power, Pump running, Dry running and Overload conditions.
- Metal enclosure.

Applications :

- Monitoring the pumpsets
- Controlling pumpsets.
- Prevents from overload conditions.
