

## **EKKI's Dewatering Technologies support Tamil Nadu State in India to Pump out Flood Water**

The State of Tamil Nadu in India suffered significant flooding as a result of the recent rainfalls. Pumps & Water technology firm EKKI's dewatering solutions supported Tamil Nadu and other coastal areas in India to manage and pump out rainwater rapidly from flooded areas.

EKKI has been proactive in providing its dewatering solutions to help remove flood waters in the affected areas. EKKI not only provided its pumps for the operations, but also deployed its technical team to support on-ground work. EKKI's dewatering solutions was selected due to its high efficiency and capacity, as well as its low operating and maintenance costs. EKKI's BOZO Dewatering pumps are perfectly designed for this type of operation-capable of handling high volumes of water and withstanding the toughest operating conditions. EKKI designs and manufacture a full line of Bozo Dewatering pumps specifically built to help combat unwanted water from floods. EKKI is a reliable partner and proven leader in the dewatering industry.

“EKKI through its partnership with global wastewater leader HOMA is one of the very few water technology companies in the world to give complete storm water & dewatering pump solutions up to 500HP and has deep design knowledge in this space”.

“We are pleased to be partnering with the government authorities in Tamil Nadu, India to enhance people's lives in these difficult times, we look forward
