PUMPS

The EKKI BOZO ESD series pumps are special construction dewatering pumps which are compact and exceptional durability in handling abrasive liquids. With their modular construction and use of ductile iron impeller, these pumps are best suited for dewatering purposes in construction sites, mines, basements, STP's, etc.,

BOZO ESD

Construction Dewatering Pumps

Technical Data :

Motor power	-	1.0 HP
Voltage	-	1 Phase (220V - 240V)
Frequency	-	50 Hz
Insulation	-	F class
Max. head	-	15 m
Max. discharge	-	15 m ³ /h
Cable length	-	8 m

Applications :

- ▶ Construction sites
- ▶ Mines, Wells & Quarries
- ▶ Swimming pools, dairies, breweries and the process industry
- ▶ Commercial & industrial wastewater drainage
- ▶ Effluent wastewater transfer

Features :

- ▶ Compact design pump with special grade impellers offer better durability for high abrasive liquids
- ▶ Hermetically sealed motor equipped build-in thermal protection
- ▶ Strainer prevents larger particles from entering

Performance Table :

Pump model	Motor Power		Rated current (A)	Delivery size	Gross weight (Kgs)	Phase	Speed : 2850 RPM						
	kW	HP					Q - m ³ /hr	0	10	20	30	40	50
							Q - l/m	0	167	333	500	667	833
							Q - l/s	0	3	6	8	11	14
ESD06 10/2 M	0.7	1.0	5.0	50mm (2")	18.0	1	Total Head in Meters	15	12	-	-	-	-
